2023

B.E [MECHANICAL ENGINEERING]

8.4 OGPA

PROJECTS

PYRAMID SOLAR STILL

A pyramid solar still is a type of passive solar distillation device used to purify water using solar energy. Its pyramid shape helps maximize sunlight absorption and improve condensation efficiency.

Advantages

.Higher efficiency than traditional single-slope stills due to better sunlight capture.

.Compact and space-efficient.

.Improved condensation with cooler outer surfaces.

.No electricity or fuel needed – fully solar-powered.

.Can be used in remote or disaster-struck areas to provide clean drinking water.
